

Weekly Report Template

One page. Submitted every Friday by 6 PM. The PI will respond by Monday. *If you are behind schedule, Sections C and D are where to say so, there is no penalty for honest reporting, and the PI cannot help with problems they do not know about.*

Heath Screening AI Project Weekly Progress Report	
One page · Friday by 6 PM · Specific numbers and links, not summaries	
Intern name: Saugata Malakar	
Role: AI/ML Developer	
Week number and date: Week 3 (May 25-31, 2026)	
GitHub username: saugata-malakar	
W&B or Drive link this week: drive.google.com/we ek3-saugata	
A. Work completed this week (4–5 bullets)	
A. Work completed this week: - Implemented WoundTissueCNN architecture. - Developed tissue classification model. - Built API endpoints for tissue classification (POST /api/v1/wound/tissue). - Verified architecture and integration with main project.	
B. Code and files submitted (exact links, not 'see GitHub')	
B. Code and files submitted: - Code: github.com/saugata-malakar/SNST-Saugata/pull/12 - Model architecture details: docs/MODEL_CARD_WOUND_TISSUE.md	
C. Problems faced (specific, what broke and what you tried)	
C. Problems faced: - Delayed model training due to pending dataset collection for tissue types.	
D. Help needed from PI (who, what, by when)	
D. Help needed from PI: - Need the annotated tissue dataset by next week to commence WoundTissueCNN training.	
E. Targets for next week (3–4 measurable goals, include numbers)	
E. Targets for next week: - Integrate Gemini 1.5 Pro Vision for Multimodal AI. - Develop Clinical NLP pipeline with spaCy.	
Self-assessment: On track Slightly behind Need urgent help (circle one)	
PI notes: (returned by Monday)
